## Central Florida

# Bloom area

Calculated over some spatial area for each weekly composite then averaged over an entire year.

# Bloom area

Calculated over some spatial area for each weekly composite then averaged over an entire year.

# Bloom area

Calculated over some spatial area for each weekly composite then averaged over an entire year.

$$\begin{aligned} \text{Bloom area} &= \frac{\text{Number of bloom pixels}}{\text{Number of observable pixels}} \times 100 \\ &= \frac{14}{40} \times 100 = 35\% \end{aligned}$$

# 2017 Median Percent Bloom Area

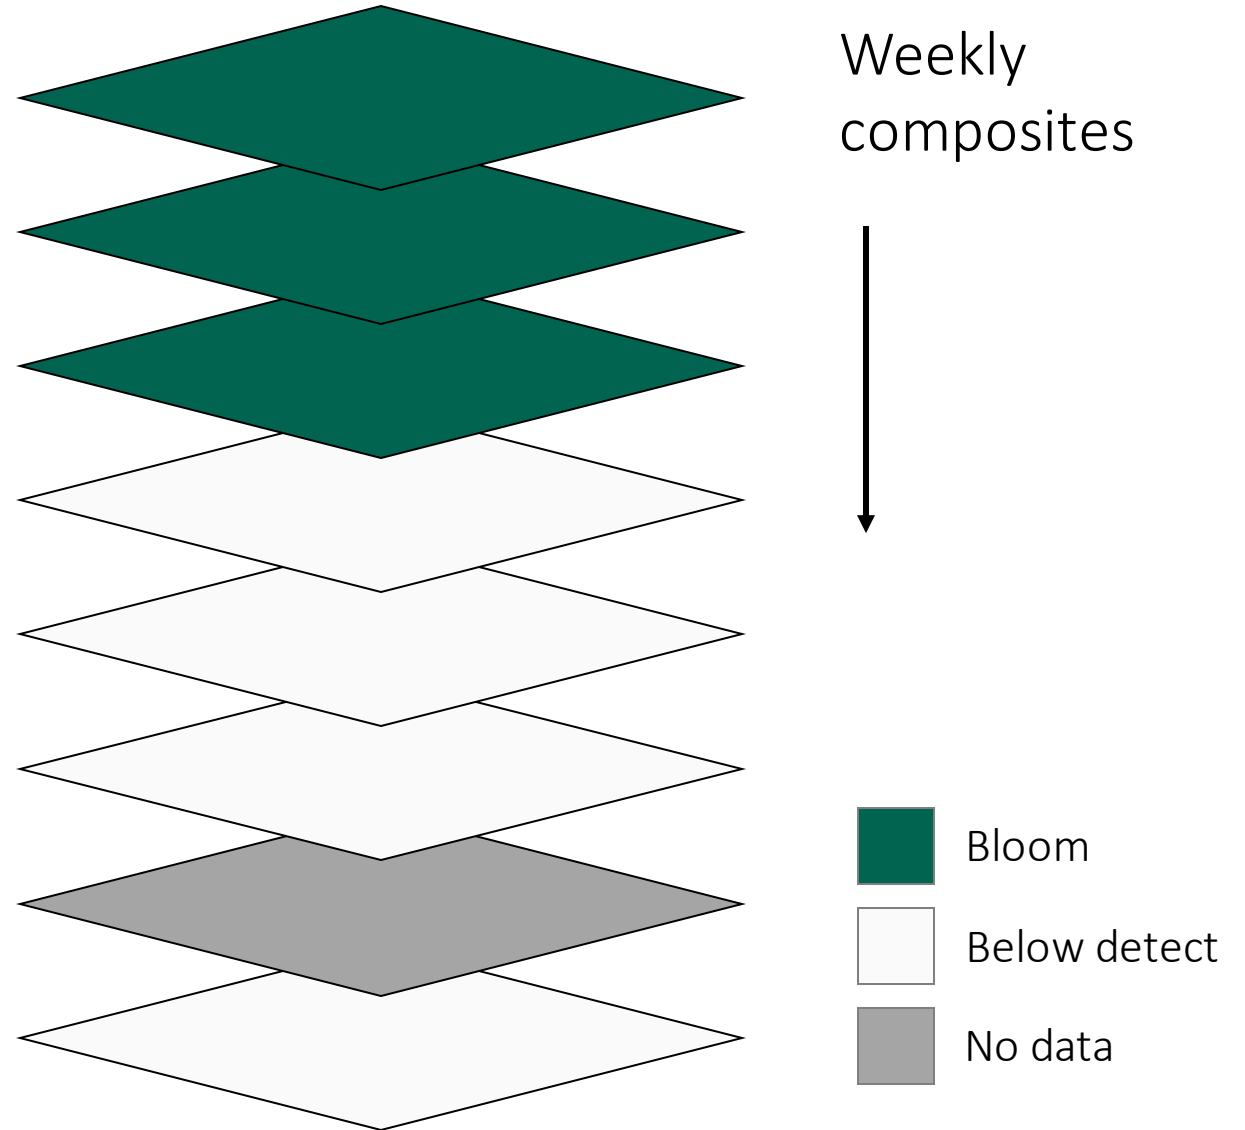

# Bloom frequency

Calculated for each pixel  
across an entire year and  
then average across a  
spatial area.

# Bloom frequency

Calculated for each pixel across an entire year and then average across a spatial area.

# Bloom frequency

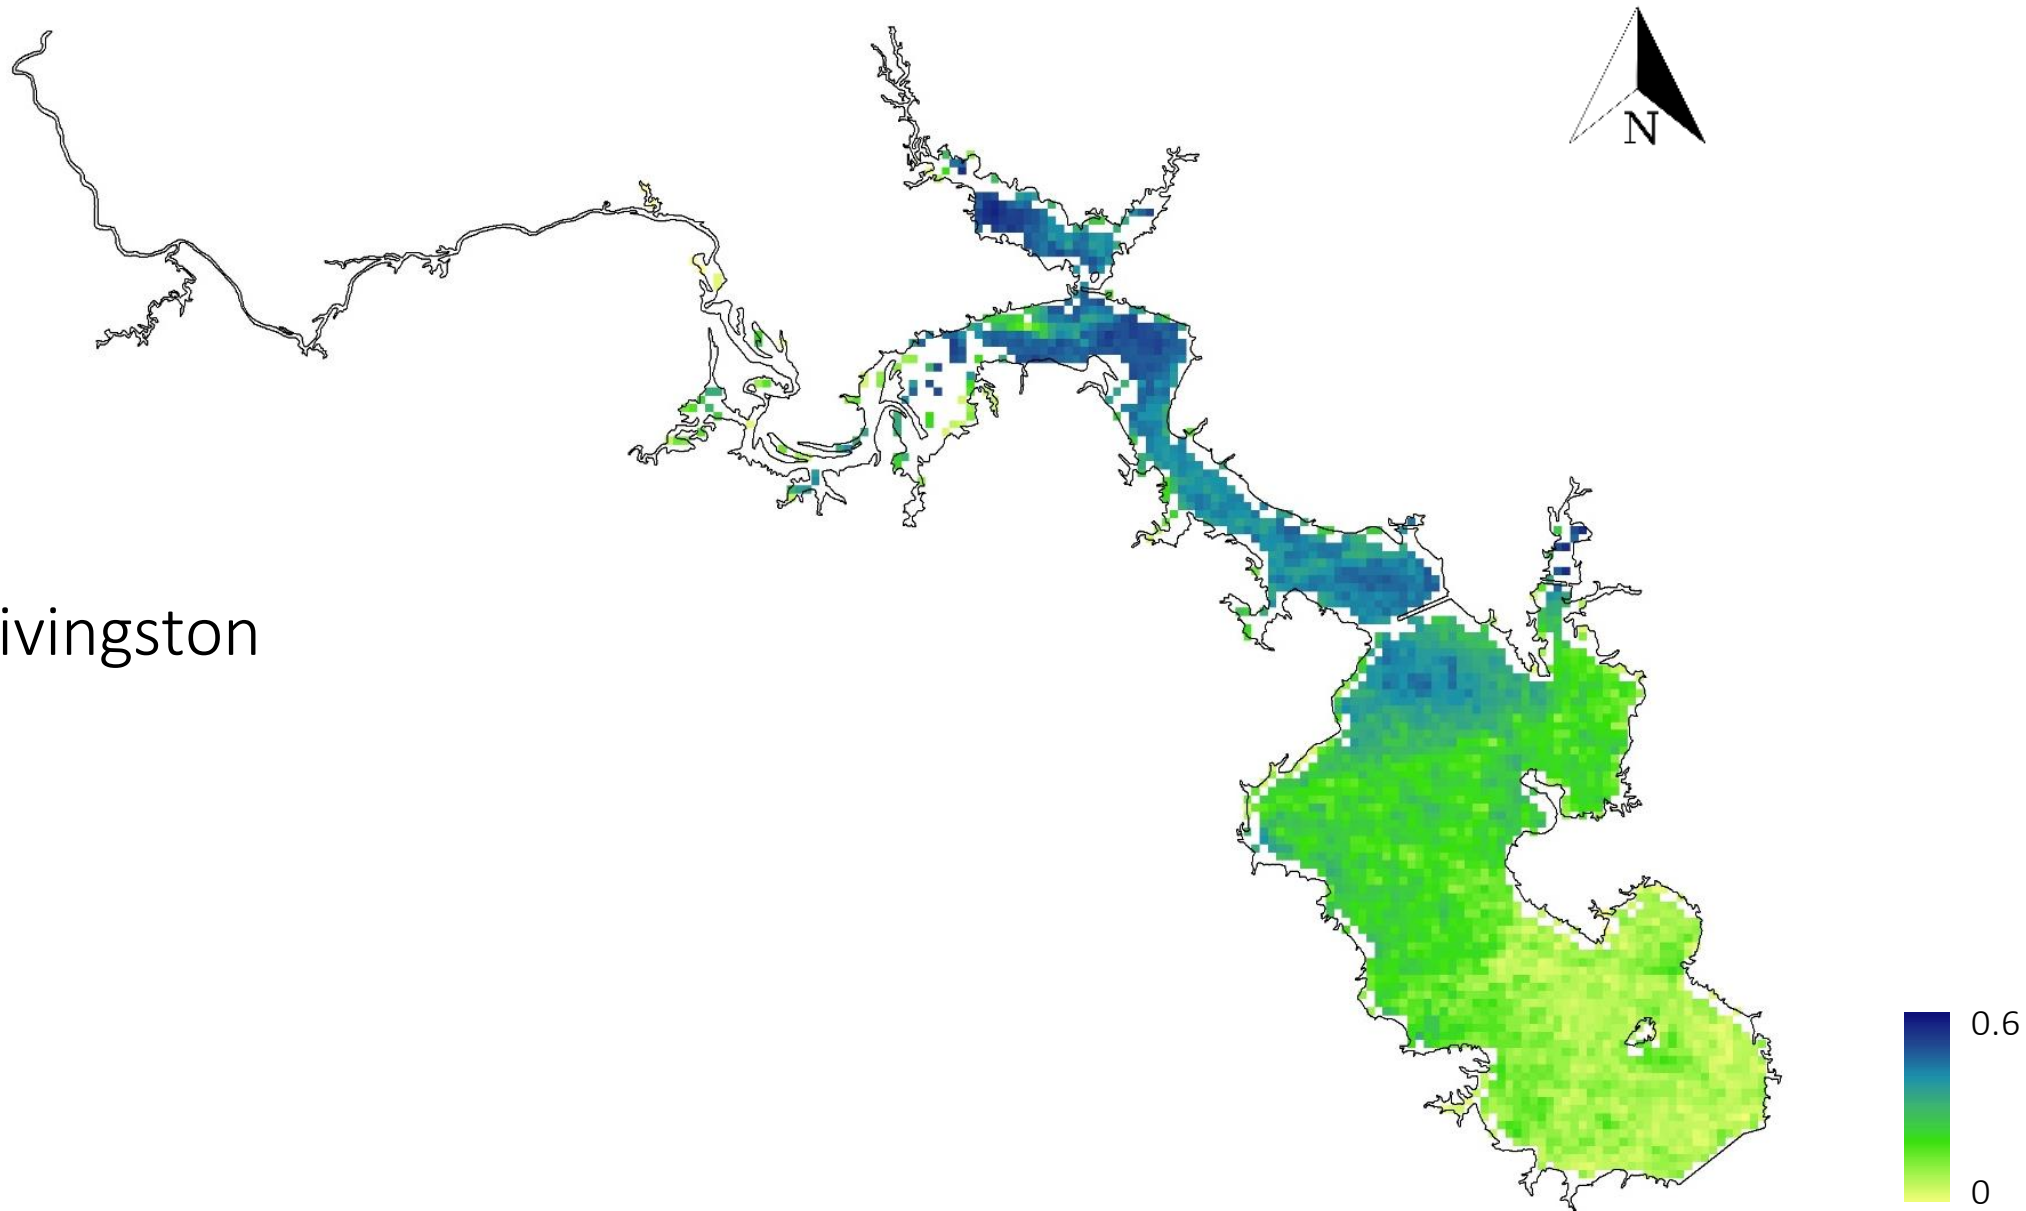

Calculated for each pixel across an entire year and then average across a spatial area.

$$\begin{aligned} \text{Bloom area} &= \frac{\text{Number of bloom pixels}}{\text{Number of observable pixels}} \\ &= \frac{3}{7} = 0.43 \end{aligned}$$

# Lake Livingston

# 2017 Average Bloom Frequency

Drinking water intake
